PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with 8+ years of software engineering experience and deep hands-on expertise in containerization, CI/CD automation, cloud infrastructure, and monitoring. Designed and managed end-to-end DevOps pipelines for fintech and enterprise platforms — from local Docker environments to production Kubernetes clusters on AWS. Strong software development background (C#, .NET, Node.js) means I can debug issues at the code level, not just the infrastructure level. Thrive in remote-first, fast-paced environments where automation and reliability matter.

AREAS OF EXPERTISE

CI/CD Pipeline Design & Automation	**Docker & Kubernetes**	**AWS Cloud Infrastructure**
Infrastructure as Code	**Monitoring & Observability**	**Microservices Deployment**
Linux Administration	**Containerized Application Delivery**	**Security & Compliance**
Jenkins & GitHub Actions	**Zero-Downtime Deployments**	**Developer Experience (DX)**

TECHNICAL SKILLS

Containers: Docker, Kubernetes, Helm, Rancher, Docker Compose
CI/CD: Jenkins, GitHub Actions, GitLab CI (familiar), Automated Testing Gates
Cloud: AWS (EC2, S3, RDS, EKS, IAM, VPC), Linux Server Administration
Monitoring: Prometheus, Grafana, Elasticsearch, Kibana, Alerting & Dashboards
IaC & Config: Bash scripting, YAML, environment management, secrets management
Networking: DNS, NGINX, Reverse Proxying, Load Balancing, SSL/TLS
Languages: Bash, Python, C#, JavaScript (for tooling & automation scripting)
Security: JWT, OAuth2, KYC/AML compliance, RBAC, audit logging
Tools: Git, Jira, Linux, Agile/Scrum

PROFESSIONAL EXPERIENCE

Talavest | DevOps & Infrastructure Engineer

April 2025 – Present Remote | Tabriz, Iran

- Designed and owned the full DevOps stack for a production fintech platform serving live gold investment users.
- Built CI/CD pipelines with Jenkins and GitHub Actions: automated build → test → containerize → deploy workflows with rollback capability.
- Containerized all microservices with Docker; orchestrated production deployments with Kubernetes for auto-scaling and zero-downtime releases.
- Deployed and managed infrastructure on AWS including compute, managed databases, and networking.
- Implemented full observability stack: Prometheus metrics collection, Grafana dashboards, Elasticsearch log aggregation — enabling sub-minute incident detection.
- Established security controls: secret management, RBAC, encrypted communications, and audit trails for financial compliance.

Tech Stack: *Docker, Kubernetes, AWS, Jenkins, GitHub Actions, Prometheus, Grafana, Elasticsearch, Rancher*

Live: *talavest.com | my.talavest.com | panel.talavest.com*

Shaskam (TCI Contractor) | **CI/CD & Infrastructure Engineer**

April 2021 – November 2023 Tabriz, Iran

- Managed Jenkins-based CI/CD pipelines for a national-scale enterprise CRM platform with strict release governance.
- Enforced Git branching strategies and automated deployment gates across a large multi-team codebase.
- Worked within enterprise infrastructure with Oracle databases, on-premise servers, and regulated release management.

Tech Stack: *Jenkins, Git, Oracle, SQL Server, Linux*

Ifa Sanat Gharb Co., Ltd. | **Infrastructure & Backend Engineer**

August 2022 – August 2024 Tabriz, Iran

- Designed infrastructure for industrial IoT systems: real-time data pipelines, server-side event streaming, and live dashboard delivery.
- Managed Linux server environments for production industrial monitoring systems with high uptime requirements.

Tech Stack: *.NET, Linux, MySQL*

Freelance | **DevOps & Deployment Consultant**

January 2021 – October 2022 Remote

- Provided end-to-end deployment and infrastructure setup for multiple client projects: containerization, reverse proxy (NGINX), SSL, and monitoring.
- Automated build and release pipelines for Node.js and .NET applications with Jenkins.

Tech Stack: *Docker, Jenkins, GitHub Actions, NGINX, Linux, Node.js, .NET Core*

EDUCATION

Bachelor of Science — Computer Software Engineering

University of Bonab | 2013 – 2017
