PROFESSIONAL SUMMARY

Senior .NET Backend Developer with 8+ years of experience building high-performance, enterprise-grade APIs and backend systems using C#, ASP.NET Core, and .NET ecosystem tools. Deep expertise in Clean Architecture, SOLID principles, and RESTful API design — proven in fintech, telecom, medical, and industrial domains. Delivered mission-critical platforms handling secure financial transactions, KYC workflows, and nationwide B2B CRM systems. Comfortable working independently in remote-first environments and delivering production-ready code on tight schedules.

AREAS OF EXPERTISE

ASP.NET Core & .NET Ecosystem	**RESTful API Design & Development**	**Clean Architecture & SOLID**
SQL Server & PostgreSQL	**Microservices Architecture**	**Enterprise CRM/ERP Systems**
Fintech & Payment Systems	**Authentication & KYC Workflows**	**TDD & Unit Testing**
Docker & Containerization	**CI/CD Pipeline Automation**	**Agile / Scrum**

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, SQL
Frameworks: ASP.NET Core, ASP.NET MVC, Razor Pages, Entity Framework Core, Dapper
Architecture: Clean Architecture, SOLID, OOP, TDD, CQRS, Repository Pattern, Microservices
Databases: SQL Server, PostgreSQL, MySQL, Oracle, PL/SQL, Redis
API Design: RESTful APIs, Swagger/OpenAPI, JWT Auth, OAuth2, KYC/AML Flows
Testing: NUnit, xUnit, Moq, Integration Testing
DevOps: Docker, Jenkins, GitHub Actions, AWS, Git
Tools: Visual Studio, Rider, Jira, Postman, Agile/Scrum

PROFESSIONAL EXPERIENCE

Talavest | Senior .NET Backend Developer

April 2025 – Present Remote | Tabriz, Iran

- Architected and built RESTful APIs in ASP.NET Core powering a gold investment platform — public site, e-commerce, user dashboard, and admin panel.
- Designed secure financial transaction flows with JWT authentication, role-based access control, and audit logging.
- Implemented microservices-based backend architecture enabling independent deployment and horizontal scaling.
- Established code quality standards with NUnit/xUnit test suites achieving high coverage across core business logic.
- Managed SQL Server and PostgreSQL databases: schema design, stored procedures, query optimization, and migrations.

Tech Stack: *.NET Core, ASP.NET Core, SQL Server, PostgreSQL, Docker, Jenkins, GitHub Actions*

Shaskam (TCI Contractor) | Senior .NET Software Engineer

April 2021 – November 2023 Tabriz, Iran

- Led backend rebuilding of the national B2B CRM platform for the Telecommunication Company of Iran serving thousands of enterprise clients.
- Developed KYC (Know Your Customer) APIs in .NET Core enforcing secure, regulatory-compliant client authentication.
- Designed and implemented a no-code dynamic form builder allowing business teams to configure workflow forms without developer involvement.
- Maintained and optimized complex Oracle PL/SQL stored procedures and queries supporting high-volume enterprise data operations.
- Followed strict enterprise release controls: code reviews, Git branching strategies, Jenkins CI/CD pipelines.

Tech Stack: *.NET Core, Oracle PL/SQL, SQL Server, Jenkins, Git*

Lsevin — Medical Tourism Platform | Backend Developer

2024 – 2025 Remote

- Built multi-role backend APIs for a medical tourism platform: patient management, provider scheduling, booking flows, and admin controls.
- Designed relational database schema for complex multi-role data relationships with data integrity and referential constraints.
- Implemented multilingual API responses and secure authentication supporting a global, international user base.

Tech Stack: *.NET Core, PostgreSQL, Docker, Node.js*

Ifa Sanat Gharb Co., Ltd. | Backend / R&D Engineer

August 2022 – August 2024 Tabriz, Iran

- Designed backend architecture for industrial-grade remote flowmeter monitoring systems with real-time data streaming.
- Built CRM and ERP backend modules replacing manual production management processes with automated, API-driven workflows.
- Developed high-performance APIs for real-time data pipelines interfacing with hardware systems.

Tech Stack: *.NET, MySQL, JavaScript*

Freelance | Backend Developer

January 2021 – October 2022 Remote

- Built a cryptocurrency payment gateway with secure transaction handling, blockchain API integration, and KYC verification workflows.
- Developed web scraping and data aggregation backend systems for multi-source data collection and processing.
- Implemented real-time WebSocket-based messaging backend for a live customer support chat system.

Tech Stack: *.NET Core, Node.js, Oracle, WebSockets, Blockchain APIs*

Iknow.ir | Senior Software Engineer

March 2017 – March 2018 Tabriz, Iran

- Developed enterprise ERP backend modules: payroll processing, notifications, reporting pipelines, and BPMS workflow engines.
- Optimized SQL Server queries and stored procedures improving reporting system performance significantly.

Tech Stack: *.NET, SQL Server, Angular*

EDUCATION

Bachelor of Science — Computer Software Engineering

University of Bonab | 2013 – 2017
