PROFESSIONAL SUMMARY

Experienced WordPress Developer and Full-Stack Engineer with 8+ years of web development expertise, including deep hands-on experience with WordPress theme and plugin development, WooCommerce, and PHP/MySQL. Built and maintained production WordPress sites across e-commerce, corporate, and industrial domains — including a live bullion trading platform (shop.talavest.com). Strong technical SEO background covering keyword research, Google Search Console analysis, Core Web Vitals optimization, and on-page strategies. Full-stack engineering skills (.NET, React, Node.js) mean I bring serious development depth to WordPress projects — not just theme customization.

AREAS OF EXPERTISE

WordPress Theme Development	**Custom Plugin Development**	**WooCommerce & E-Commerce**
PHP & MySQL Backend	**Performance & Core Web Vitals**	**Technical SEO (Yoast/RankMath)**
REST API & Headless WordPress	**Page Builders (Elementor/ACF)**	**Site Migration & Optimization**
Security Hardening	**Full-Stack Web Development**	**CI/CD & Deployment**

TECHNICAL SKILLS

WordPress: Custom Theme Development, Child Themes, Plugin Development, hooks/filters/actions, WP REST API
WooCommerce: Store setup, custom product types, payment gateway integration, order workflows, extensions
PHP & Backend: PHP 8+, MySQL, custom post types, taxonomies, meta boxes, WP-CLI
Page Builders: Elementor, ACF (Advanced Custom Fields), Gutenberg blocks
Frontend: HTML5, CSS3, JavaScript, jQuery, React (Headless WP / block editor)
SEO: Technical SEO, Yoast SEO, RankMath, Google Search Console, Core Web Vitals, Keyword Research, On-Page Optimization
Performance: Caching (WP Rocket, W3 Total Cache), image optimization, CDN, LCP/CLS/FID optimization
Security: Hardening, SSL, Wordfence, backup strategies, malware cleanup
DevOps: Docker, GitHub Actions, Linux server admin, cPanel/Plesk, NGINX/Apache
Other Stack: C#, .NET Core, Node.js, React — for custom integrations and headless approaches

PROFESSIONAL EXPERIENCE

Talavest | WordPress Developer & Full-Stack Engineer

April 2025 – Present Remote | Tabriz, Iran

- Built and maintain the WordPress-powered gold and silver bullion e-commerce platform (shop.talavest.com) — a live WooCommerce store with custom product configurations and payment flows.
- Developed a custom WordPress theme aligned with brand identity, optimized for performance and mobile responsiveness.
- Implemented WooCommerce extensions for gold/silver bullion product types, dynamic pricing, and order management workflows.
- Conducted in-depth technical SEO: keyword research (Persian transactional and long-tail terms), Google Search Console data analysis, competitor mapping, and structured on-page optimization across all product and category pages.

- Optimized Core Web Vitals (LCP, CLS, FID) across the storefront — improving page speed scores and search rankings.
- Integrated WordPress REST API with the broader Talavest platform (Next.js dashboard, .NET backend) for a unified content and data layer.

Tech Stack: *WordPress, WooCommerce, PHP, MySQL, Elementor, ACF, Yoast SEO, Google Search Console, Docker*

Live: *shop.talavest.com*

Ifa Sanat Gharb Co., Ltd. | WordPress Developer & R&D Engineer

August 2022 – August 2024 Tabriz, Iran

- Built and maintained the corporate WordPress website for an industrial manufacturing company — custom theme, content management, and service showcase pages.
- Developed custom WordPress plugins to display real-time product data and CRM-integrated contact forms.
- Managed Linux hosting environment, NGINX configuration, SSL, and site performance optimization.

Tech Stack: *WordPress, PHP, MySQL, JavaScript, Linux, NGINX*

Freelance | WordPress & Full-Stack Developer

January 2021 – October 2022 Remote

- Delivered multiple client WordPress projects: custom themes, WooCommerce stores, landing pages, and membership sites.
- Integrated third-party APIs (payment gateways, CRMs, email platforms) via custom WordPress plugins.
- Performed site migrations, speed optimizations, security hardening, and SEO audits for existing client sites.
- Built headless WordPress solutions with React frontend consuming WP REST API for clients needing custom UX beyond traditional themes.

Tech Stack: *WordPress, WooCommerce, PHP, MySQL, React, REST API, Elementor, ACF*

Lsevin — Medical Tourism Platform | Full-Stack Developer

2024 – 2025 Remote

- Delivered full-stack web platform with content management requirements — experience applicable to WordPress-based content and booking systems.
- Implemented multilingual support for an international audience — directly applicable to WPML/Polylang WordPress multilingual setups.

Tech Stack: *.NET Core, React, Next.js, Node.js, PostgreSQL*

Shaskam (TCI Contractor) | Senior Software Engineer

April 2021 – November 2023 Tabriz, Iran

- Built large-scale enterprise web platform — backend discipline, database design, and API architecture skills that elevate WordPress development beyond simple theme work.
- Delivered complex admin interfaces and workflow systems — applicable to advanced WordPress admin customization and plugin architecture.

Tech Stack: *.NET Core, React, Oracle PL/SQL, SQL Server, Jenkins*

WORDPRESS & SEO HIGHLIGHTS

- Live WooCommerce store: shop.talavest.com — custom theme, bullion product types, dynamic pricing, payment integration.
- Technical SEO: Keyword research, GSC data analysis, competitor gap mapping, structured content action plans across Persian and English markets.
- Core Web Vitals optimization: Performance auditing and implementation across WordPress/WooCommerce storefronts.
- Headless WordPress: Experience integrating WP REST API with React/Next.js frontends for decoupled architecture.
- Full-stack depth: PHP/MySQL expertise backed by .NET Core, Node.js, and PostgreSQL experience for complex custom plugin and integration work.
