MOHAMMAD JAFARIYAN KHOSROWSHAHI

SENIOR SOFTWARE ENGINEER | BACKEND, FULL-STACK & APPLIED AI

mohammad.jafariyan7@gmail.com | linkedin.com/in/mohammad-jafariyan7
mohammadjafariyan.github.io | Open to international relocation

PROFILE

Software engineer with 8+ years building production applications for fintech, telecom, healthcare services, and industrial operations. Core strengths: C#/.NET, API and database design, React/Next.js, and end-to-end delivery. Applied AI experience includes LLM agents, retrieval-augmented generation (RAG), and Model Context Protocol (MCP) integrations.

TECHNICAL SKILLS

Backend C#, ASP.NET Core, .NET, Node.js, REST APIs, JWT/OAuth2, WebSockets, microservices

Frontend & data React, Next.js, Angular, TypeScript, JavaScript, SQL Server, PostgreSQL, Oracle PL/SQL, MySQL

Applied AI Python, LangGraph, CrewAI, LangChain, RAG, MCP, tool/function calling, LLM API integrations

Platform Docker, Kubernetes, AWS, Jenkins, GitHub Actions, Linux, Elasticsearch, Prometheus, Grafana

APPLIED AI ENGINEERING

- Built agent workflows with LangGraph and CrewAI, using tool calling and MCP servers to connect LLMs to structured APIs and resources.
- Developed RAG workflows covering document ingestion, retrieval, and context-aware responses; integrated AI capabilities with backend APIs and streaming responses.

PROFESSIONAL EXPERIENCE

Talavest | Full-Stack Software Engineer — Apr 2025 – Present

- Built .NET/Node.js APIs and transaction-related workflows for a gold investment platform, including authentication, customer accounts, and operational tools.
- Developed React/Next.js investment dashboards, commerce pages, and admin interfaces; supported CI/CD, Kubernetes deployment, and observability.

Lsevin | Full-Stack Engineer — Jan 2026 – Present

- Developed patient, provider, and admin workflows for a medical-tourism platform, including booking, scheduling, multilingual interfaces, and .NET/PostgreSQL APIs.

Shaskam | Senior Software Engineer — Apr 2021 – Nov 2023

- Helped rebuild a telecom B2B CRM: developed .NET KYC APIs and React/Next.js admin dashboards, and worked on BPMS workflows and a configurable form builder.
- Maintained Oracle PL/SQL integrations and worked within Git/Jenkins-controlled deployment processes.

Ifa Sanat Gharb | Backend / R&D Engineer — Aug 2022 – Aug 2024

- Built industrial flowmeter monitoring software with real-time dashboards and CRM/ERP functionality using .NET, JavaScript, and relational databases.

Freelance | Software Developer — Jan 2021 – Oct 2022

- Built a WebSocket-powered customer chat component, web scraping/data aggregation systems, and cryptocurrency payment integrations.

Iknow.ir | Software Engineer — Mar 2017 – Mar 2018

- Maintained an Angular report designer for enterprise ERP software and integrated dynamic reporting with backend data.

Arka Data Mining | Software Engineer — Mar 2016 – Mar 2017

- Built Angular admin interfaces and BPMS features for a national trade-workflow platform.

EDUCATION

B.Sc., Computer Software Engineering | University of Bonab | 2013–2017
